

Advanced Training

CEU's available

The advanced training is offered to graduates of the 3-year foundation training and to therapists out of other professional directions. This supervision course lasts over 1 year in which the emphasis is on supervision of individual and group therapy. It consists over 5 course modules of 2 ½ days. The advanced training course consists of the following aspects:

Unit 1 Case study and clinical seminar

will emphasize how the therapist becomes able to discover the essential qualities of the client, as well as the principle defense pattern of the client. We will also clarify transference patterns of the therapist and develop new strategies.

Unit 2 Theoretical and practical expansion on special clinical theme

will emphasize the subject of working with a client who was traumatized. Main therapeutic principles will be shown. We will go intensively into individual case studies.

Unit 3 Case study and clinical seminar

will emphasize how to work with the Biosynthesis therapy hexagram regarding the therapists client. Supervision on therapeutic strategies are the main subject.

Unit 4 Theoretical and practical expansion on special clinical theme

will emphasize the subject of working and supporting a client during pregnancy. We look into the subject of abortion, miscarriage and "lost twin". We go deeply into case studies.

Unit 5 Different strategies of therapeutic intervention

will emphasize the abilities of the therapist, as well as the abilities of the client. What is appropriate at what time, what strategy is suitable for different character types. Finding essential qualities of the therapist, meeting the client beyond the level of problems.

Module 1-5 Tuition is \$ 1990, Guest tuition is \$440 per module.
